Census 2020 Symposium
Tuesday, March 24 | 11:30am - 4:30pm

Mandated by the U.S. Constitution, the Census has provided a complete count of the total U.S. population every 10 years since 1790. These data are not only critical for understanding demographic change within the country but also for apportioning congressional seats and allocating billions of dollars in federal funding to states and communities. Join us for a half-day symposium as we consider issues and opportunities related to the collection and use of Census data in 2020 and beyond.

Keynote Address, 12:00pm
Steven Ruggles
University of Minnesota
Regents Professor of History and Population Studies
"It's None of Their Damn Business': Privacy and Disclosure Control in the U.S. Census, 1790-2020"
